

CLIPPER NAVIGATION

DECEMBER 2003 – JANUARY 2004

Case Study

The Project:

Bank & Office Interiors worked with Clipper Navigation to remodel their reception area and reconfigure their workspace. The project consisted of the delivery and installation of two new Answer reception stations and 750 sq. yds. of Shaw carpeting. In addition, seven (7) private offices, twenty (20) workstations and a conference room were re-configured to create more effective teaming spaces and individual processing stations.

For this project, B&OI also oversaw the trades responsible for painting the workspace.

B&OI provided the following services for this project: delivery/installation, fabricating, reconfiguration, technical specification, move, and project management.

B&OI Project Team

Account Representative: Katy Oliver
Sales Coordinator: Sandy Jones
Technical Services: Gayla Guenther
