

ENVIRONMENTAL STATEMENT

COMMITMENT TO SUSTAINABLE PRODUCTS

B&OI looks toward reaching a sustainable environment from the ground up. Seeking a total, environmental approach for the products we specify, deliver, install, maintain and warranty. Durable products that last longer and our customers keep longer – keeping waste out of landfills every year.

Sustainable products that understand the relationship between work and ecological environments.

At Bank & Office Interiors we believe that sustainable design is sustainable leadership.

INTERNAL PRACTICES

Bank & Office Interiors is committed to being a corporate citizen in environmental stewardship through recycling, refurbishment and the promotion of As-Is product.

Each B&OI office location participates in recycling programs. All workstations are equipped with paper recycling receptacles. Forms, marketing documents and other internal documents are distributed electronically via our intranet and printed on an as-needed basis. In addition, all copiers and printers use recycled paper that made from 30% post-consumer use material. We also participate in the aluminum and newspaper recycling in the breakrooms.

Our Operations Warehouse recycles approximately six (6) tons of cardboard and 10 bales of plastic a month. Disposal of materials such as paint, paint thinner and wood stains are managed by FBN Enterprises, environmental consultants.

In an effort to keep furniture products out of landfills, B&OI provides refurbishment services. This year alone we have refurbished 2,100 panels and repainted 1,000 pieces of furniture. In addition, we have sold 450 As-Is stations.
