Technology Wall

Ambient

Ambient lighting can be applied in virtually any application for a comfortable work environment

Accent

Accent lighting provides an added flair

Task

Task lighting helps you focus on the project at hand (available through Steelcase and Details)

Safety

Safety lighting helps guide occupants

Control

Controls allow lighting levels to be adjusted building-wide or individually to save energy and provide personal comfort**

Create lighting solutions that inspire people at work.

- Our alliance with Lightolier can help you simplify planning by enabling your Steelcase dealer to be a single-source provider of lighting, architecture, furniture and technology
- Design your space choosing from the thousands of lighting solutions available
- Create a brilliant solution with lighting that highlights architecture and defines space
- Blend the right mix of ambient, accent and task lighting for a more comfortable, effective work environment*
- Refine your lighting plan to increase efficiency and reduce energy costs**
- Choose from architectural lighting solutions that have been designed to integrate with Steelcase walls and panels

Lighting Research

* 86% of respondents perceived that improved lighting led to improved mood and energy level, 75% perceived improved efficiency and productivity and 66% perceived improved creativity (Steelcase Workplace Index Survey)

** When Reno Post Office replaced their direct lighting with an updated indirect lighting system, they saved on electricity and realized a sustained 6% increase in worker productivity—enough to recover the cost of the new lights in less than a year

*** User control was an important factor for 48% of respondents (Steelcase Workplace Index Survey)
